Trusted Global Innovator

WE MANAGE YOUR CLOUD

Managed Services for New Business Models
Managed services are gaining popularity for businesses looking to reduce complexity and free up internal resources. In today's market, there is a lot of pressure on IT departments to innovate and become an integral part of business-driving operations. To do so, CIOs must concentrate on eliminating laborious tasks and giving their teams more freedom to innovate.

Public Cloud Services with NTT DATA Business Solutions
Our global portfolio helps businesses operate with added flexibility. From advisory to operation, license management to Managed Cloud and Application Management Services, our services can aid all areas of your organization. With added public and hybrid cloud services, we complement our SAP basis, database, and system administration services for SAP applications. Our integrated service and virtual data center management enables easier support of business processes and provides a clearer overview of data exchange. With our public cloud services, you can quickly adapt innovations to growing and new business requirements.

Supporting Your SAP Applications
We offer complete hosting of SAP application and system landscapes, including development, quality assurance, and production systems based on individually designed and certified private and public cloud infrastructure. Our experts manage your infrastructure and application environment holistically on any platform. Through implementing ERP and CRM or cloud solutions from the SAP S/4HANA suite we help you ensure uninterrupted IT operation. Our services include provisioning for all application layers, SAP application servers, and additional system components such as gateways, Adobe Document Services, and SAP Fiori® front-end apps.

Achieve Increased Efficiency
NTT DATA Business Solutions leverages cloud platforms like Amazon Web Services or Microsoft Azure to support businesses with more flexibility. Test and development systems that are not used all the time are particularly suitable for operation on shared cloud infrastructure which can lead to savings in the double-digit range. And even production and disaster recovery environments benefit from the rapid provisioning of infrastructure in minutes instead of days. Additionally, optimized storage resources fulfill backup and archiving requirements.

> We accompany you on the entire cloud journey. Our specialists have a wealth of experience in cloud projects for customers around the world from various industries. As multiple awarded-winning SAP, our customers trust in our competency.

> When digitizing their business, SAP customers seek ways to access critical data easily and reliably. Our focus lies in optimizing business applications from the cloud to the customer.

Norbert Rotter, CEO, NTT DATA Business Solutions AG

**Infrastructure as a Service**
Cloud computing is a strategic part of business development in the digital age. We can help in laying the foundation for the future by harmonizing private and public cloud structures with your existing applications. What's more, with a single partner to monitor and maintain your system landscapes, you are future-proofing your cloud infrastructure.

Safe and Secure Cloud Operations
It is important to assess your specific data protection requirements and the security measures offered by your cloud provider. We advise you on advanced backup, failover, and recovery and provide you with information on data protection policies and certifications.

Why Choose NTT DATA Business Solutions as Your Cloud Partner?
- Experienced: 30+ years of experience and extensive knowledge of SAP applications and 250+ system implementations on public cloud
- Affordable: pay-per-use price model available for all infrastructure services
- Flexible: scalable packages for you to choose options according to your specific needs
- Expandable: additional data center and hosting options available
- Reliable: service level agreements for high availability with disaster recovery options

Do you want to maximize the burgeoning potential of your current SAP technologies?
If so, then we could be your perfect partner. We support our customers with an unrivalled wealth of experience from a multitude of successful projects.

We provide cloud advisory, migration and managed services with flexible licensing, support and billing options and tailor them to your individual needs.

We implement and operate business-critical applications with flexible service levels on scalable and secure cloud infrastructure that offers high availability in conformity to the latest data protection requirements.

Get in touch today to learn more about taking your business to the cloud.

We Transform. SAP® Solutions into Value
Digital transformation helps companies reach their full potential – if the underlying technologies work for the people using them! At NTT DATA Business Solutions, we design, implement, manage and continuously enhance SAP solutions to make them work for companies – and for their people.
