TAKE CONTROL OF YOUR CUSTOM CODE WITH A HEALTH CHECK

After spending time and resources building custom SAP code for your company, finding out that some code is going unused, causing higher support and testing efforts –especially on upgrades –or there’s no documentation of current custom objects can be frustrating. In addition, as more changes and customizations are added, there’s a higher chance updates will begin to overlap and likely result in more harm than good if it’s not managed correctly.

When custom code is added to your SAP system, it can add many benefits and time savers, but it tends to be the most expensive piece from the perspective of running the system. Because custom code is added in manually, time to complete tasks is longer, and providing output becomes more difficult.

With the right partner, your business can achieve efficient management of custom code, create a custom code strategy, and find areas for improvement. By making sure your existing custom code is optimized, you’ll ensure that your business is well positioned for its digital journey.

How It Works

On-demand Custom Code Health Checks provide your company with a detailed analysis and transparency into your custom code to help you understand what code exists, how much it is actually used, and if it is appropriate. NTT DATA Business Solutions will assist your company with custom code management and an analysis of your custom code objects, including usage, quality, and optimization.

Benefits for your Business

- Transparency and analysis of custom code footprint
- Recommendations for efficiency gains and less overhead
- Identifiable improvements
- Efficient management of custom code
- Access to Solution Manager as a Service

About Solution Manager as a Managed Service

Solution Manager as a Managed Service (SMaaS) allows you to realize the full benefits of Solution Manager without having to worry about maintaining hardware, configuring the system, and having the internal knowledge to keep the system up to date.

1. No infrastructure, license or upgrade costs

2. Predictable and affordable pricing

3. Complete set-up and configuration in two weeks
