

The Efficient Way to Migrate to the Next-Generation Business Suite

Move Your Existing ERP System to SAP S/4HANA® on Microsoft Azure

System Conversion from Your Existing SAP Business Suite

SAP will provide mainstream maintenance for core applications of SAP Business Suite software until the end of 2027. This announcement has prompted many customers using SAP's older ERP systems to move to the new generation: SAP S/4HANA. The system conversion is proving to be a popular transition path, and itelligence has supported many of these projects. It is the natural choice if you are running SAP ERP 6.0, EHPxx, Any DB, or SAP HANA® DB.

A Packaged Solution for Your PoC

Based on our experience, we developed a solution which enables you to convert your system in the most efficient and modern way. The SAP S/4HANA on Azure Conversion proof of concept (PoC) makes it possible to make a fast and easy move from your hosted or on-premise ERP system to SAP S/4HANA on Microsoft Azure. The target is to provide an SAP S/4HANA system based on your original data, but with minimum conversion effort. You'll get all basic functionality for test purposes and to understand the procedure and resources required. You will also learn everything about SAP S/4HANA in preparation for further productive use.

Your Benefits

- SAP S/4HANA on Azure Conversion PoC project time of 10 to 12 weeks only
- No need for any platform preparation

- Fast and easy system transition to Azure
- Most activities performed remotely
- Conversion based on standardized factory approach
- All minimum required pre- and post-conversion activities are included
- Usage of up-to-date SAP tools (Maintenance Planner, SUM, DMO, SAP Readiness Check)
- Additional itelligence accelerator toolkit for faster data migration and code analysis
- Guided test included after technical conversion

SAP S/4HANA on Azure Conversion – Services

- Preparation workshop to define project scope
- OSS notes installation, required for conversion
- CVI (customer/vendor integration) basic option
- New General Ledger (GL) migration through system conversion tools (classic GL functionality)
- SAP ECC EHP7 or higher (other EHP at additional cost)
- Custom code remediation for technical adjustment of standard processes
- Presentations of results and efforts
- All SAP HANA infrastructure included on Microsoft Azure
- System shutdown at non-office hours for cost reduction
- Full system backup on MS Azure cloud

Higher Volume?
Continuation of the PoC?

Please ask for extended options.
We offer additional services and upgrade packages.

itelligence and Microsoft

itelligence and Microsoft have entered a strategic partnership, aiming to support businesses with more flexibility through Microsoft Azure cloud infrastructures. The partnership helps customers maximize the benefits of SAP HANA, SAP S/4HANA, and SAP C/4HANA®. Together, itelligence and Microsoft can provide customers with solutions for migrating, implementing, monitoring, managing, and optimizing workloads on public cloud infrastructures. itelligence can also support clients with the migration of classic SAP products to Microsoft Azure for better performance and efficiency.

Why itelligence?

- **Experienced:** 45+ successfully realized conversion projects and Center of Expertise for SAP S/4HANA conversions
- **Affordable:** Fixed price offering through packaged approach and low impact on your internal resources
- **Fast:** Short project runtime
- **Reliable:** 200+ skilled conversion experts
- **Predictable:** Proven runtime experience, based on conversion questionnaire and SAP Readiness Check
- **Non-disruptive:** Experience SAP S/4HANA within your familiar environment
- **Competent:** Gain valuable project experience for your SAP S/4HANA conversion
- **Future proof:** Experience the benefits of the SAP digital core right now
- **Professional:** Conversion activities are supported by project management with a set of templates, project plan, activity plan, communication matrix, and RACI matrix

SAP S/4HANA on Azure Conversion PoC

Scope

One system conversion
One client
One-month testing period

Microsoft Azure

Your perfect platform for this PoC and more. Experience the benefits of flexibility and speed on Microsoft Azure.

Project Duration

10 to 12 weeks
