

Disaster Recovery as a Service

EASY, AFFORDABLE AND ROBUST DISASTER RECOVERY

NTT DATA Business Solutions

MANAGE INCREASED RISKS FROM MALWARE AND OTHER CYBER THREATS

The Price of Downtime

One of the most critical aspects of a robust business continuity strategy is ensuring that you have a strong disaster recovery plan for your business-critical SAP systems. Increased risks from malware and other cyber threats make it more important than ever to put a critical eye on ensuring your end-to-end business continuity plan sufficiently mitigates these risks.

Can your business afford to have critical business systems down? According to Gartner, the average cost of downtime is \$5,600 per minute – or \$300,000 per hour – for most mid-sized organizations. Beyond the monetary costs, downtime can wear down your business's productivity levels – at a time when you can least afford it.

Protect Your Data and Be Prepared for Disasters

The disaster recovery plan for many companies is based on using a second data center as a backup location. This solution – which is generally an option for large enterprises – can be expensive and time consuming. Although this solution may provide the ability to recover from an issue, it requires a significant amount of upfront and ongoing work, including regular updates to your disaster recovery plan.

For small and midsize businesses, an “as a service” model for disaster recovery provides an attractive alternative. This type of service can be provided at an affordable cost and provide the peace of mind that IT assets are well protected.

Introducing Disaster Recovery as a Service (DRaaS)

Our Disaster Recovery as a Service (DRaaS) can help you to set up, test, and ensure the Disaster Recovery solution covers your testing and failover capabilities if you should ever need to declare a disaster and follow through a live recovery sequence.

NTT DATA Business Solutions will provide a recovery site for your predefined critical workloads to our data center or on a hyperscaler platform of your choice. As part of this service, we offer the following:

- DR configuration services
- Workload replication
- Client access
- Regularly scheduled reporting
- Annual testing capability

Benefits for Your Business

- Assessment conducted to determine your specific needs and design the right solution
- Disaster recovery configuration is customized to your requirements
- Provision of compute and storage resources at the NTT DATA Business Solutions data center or on a hyperscaler platform of your choice
- Connection to the customer data center with VPN or dedicated data line
- Regular testing and validation
- Fully managed with service-level agreements (SLAs)
- Flexible resource availability, adjustable to business change
- End-to-end consideration of your testing and declaration needs
- Individual disaster recovery manual to ensure proper switch of application
- Provide audit compliance with a working and tested DR solution

With so much uncertainty in the business world today, you can equip your business to be better prepared with DRaaS. You'll be equipped with the ability to automatically backup critical systems and data, quickly recover from a disaster with minimal user interaction, have flexible recovery options, and easily understand your billing structure.

Why NTT DATA Business Solutions?

Digital transformation helps companies reach their full potential - if the underlying technologies work for the people using them! At NTT DATA Business Solutions, we design, implement, manage and continuously enhance SAP solutions to make them work for companies - and for their people.

Aiming to transform, grow and become more successful? We provide you with more than in-depth expertise for SAP solutions: As your passionate partner, we connect your business opportunities with the latest technologies - and offer you a unique approach to get the job done as smoothly as possible.

Our close ties to SAP and other partners give you access to innovative solutions and developments. Being part of the global NTT DATA group enables us to master any scope of project.

With operations in more than 30 countries, we have enabled thousands of companies to become more efficient and effective during the last three decades. Our 10,000 experts around the world will also accompany you on your journey toward a truly intelligent enterprise - wherever you want to start!
